Hyperdevotion Noire: Goddess Black Heart

Hyperdevotion Noire™: Goddess Black Heart , the very first strategy RPG in the *Hyperdimension Neptunia* series. Unlike previous *Hyperdimension Neptunia* games, *Hyperdevotion Noire* is not set within the world of Gamindustri, but instead within a similar, but separate, world known as "Gamarket". The goddesses of each of the four nations are locked in heated battle against one another for dominion over this world. Just as Noire is one step away from complete domination, the goddesses are suddenly robbed of their powers by an unknown force. Now in order to save the world from destruction, the four goddesses must unite Gamarket and defeat the onslaught!

A Moe Army Awaits

Lead goddesses in their first-ever foray into strategy RPG gameplay, taking on enemies in a whole new way. You'll fight off hordes of enemies in turn-based strategy, dodging laser beams and flaming pits, and using dangerous environments against your enemy.

Link up with the "Lily System"

The more often characters are in battle together, the higher their bond becomes. Activating the "Lily Boost" grants special stats and abilities, while "Lily Points" can be used to activate ultra-special moves and even goddess transformations. Don't be shy to build up those battle relationships and seal it all with a kiss!

Livin' the Noire life

Sometimes Noire just wants to relax at home, and with the "SimNoire" mode you'll be able to do just that! Customize the place by buying furniture and accessories with in-game points, and make Noire feel like the goddess she is. She'll also get to go out with friends and build up her social level!

Item customization & dual languages

You'll get tons of replay with so many ways to boost your gear's stats. The more enemies you defeat, the more items you can get to customize your gear in whatever way you see fit. Let the great experiment begin! Enjoy English in-game text and English & original Japanese in-game voices.
